Teacher (true state)
Classical, untuned filter
Classical tuned for the condition
Classical pipeline (tuned filter)
Student, restricted training
Student, varied training
nominal throws, ideal camera
realistic camera behind the robot
+ calibration 2 cm and 2°, double noise,
66 ms latency, 10 % frames lost
camera moved to the side
camera at random positions, degraded
varied throws (±45°, 1–4 m, flight 0.3–1 s)
varied throws, camera at random positions
